

Local Men Foil Robbery Attempt At Prevost Motors

A robbery attempt at Prevost Motors on Friday night of last week, which could have resulted in serious injury to at least one local man, was nipped in the bud by fast thinking and a handy pair of fists.

Raymond Johnson returned to the garage about 11:30 p.m., where he is employed, and on entering the establishment was met by an intruder who struck him a glancing blow on the head with a steel bar of no mean proportions. Johnson was quick to recover and gave the would-be tough guy a lesson in the art of fistfights. Don Bateman, who entered the garage behind Johnson, came to his assist and the robber was subdued.

Police were called and the man, later identified as James Lawrence Totten of Calgary, was lodged in the bastille at Olds for the night.

Appearing before Magistrate D. N. McDonald on Saturday morning, Totten was sentenced to three years in Fort Saskatchewan penitentiary for breaking and entering and two years for occasioning bodily harm, the sentences to run concurrently.

Break-in artists struck again on Sunday night when Payne Freeman Co. premises were entered and 11 tires, flashlights and flashlight batteries were stolen. Entrance was gained through a back door.

The same night an attempt was made to enter Atlas Lumber but only damage or loss was a broken window in the main door of the office.

No arrests have been made in the latter two cases.

MELVIN NOTES

(From Our Own Correspondent)

The October meeting of the Melvin W.I. was held at the home of Mrs. A. Schneidmiller on Friday as the hostess was cooking for the threshers on Wednesday, the usual date. In spite of the season, eight members were in attendance.

Since the present secretary, Mrs. Schneidmiller is leaving soon to take up residence in Calgary, Mrs. R. Shantz consented to take the books till the end of the year.

As her citizenship topic, Mrs. L. Chandler read a number of interesting articles on child upbringing and led a lively discussion on each. For the five-minute talk, Mrs. E. Phillips read an interesting story on the "Romance of the McIntosh Red Apple."

Arrangements were made to serve hot dogs and coffee at the Schneidmiller sale on October 15. A most original and interesting idea for the afternoon's entertainment was given by Mrs. R. Shantz, who displayed a number of mounted feathers of local birds which the ladies were to name. All discovered that their nature observations had been a bit sketchy. Mrs. George Youngs was the winner — she placed five out of 12.

At the close of the afternoon the hostess served a delicious lunch.

Most of the combining and threshing in the district has been completed. E. Dupont worked the season on Saturday by serving the crew a Thanksgiving turkey supper.

Best wishes for a speedy recovery go out to August Krebs, who is a patient in the Didsbury hospital, suffering from pneumonia. Mr. and Mrs. Emil Krebs and Mrs. Glen Roberts were Calgary visitors on Friday.

Mr. and Mrs. Emil Krebs and family enjoyed a Thanksgiving turkey supper at the home of Mr. and Mrs. Glen Roberts and family.

"THE KNOCKERS"

Any community such as ours has the normal quota of critics—known by the slang expression as "knockers"—ready at a moment's notice to provide verbal opposition to even those projects likely to bring the district success and more pleasant living conditions.

The ranks of the "knockers" would be noticeably reduced if each turned more time to reasoning and less to belittling. Canadian history pages are crammed to near capacity with the gigantic success of communities. All, as they were launched, were branded by the "Knocker Brigade" as impossible.

The best communities are the ones with few "knockers", many workers and platoons of constructive thinkers. Great community projects can be accomplished through co-operation, district pride and above all, confidence.

Accomplishments in Didsbury and district through the coming year will be greater in numbers and accomplishments if less attention is paid to the "knockers" and their first cousins, "the sad sacks." exch.

GOOD ADVICE FOR EVERYONE

For some reason we're inclined to applaud the words of the Oregon father who, when congratulating his son for landing a nice job, advised the lad never to regard himself as indispensable. "If," said the old man, "you're ever inclined to do so, stick your finger in a bucket of water and notice the hole it leaves when you pull it out."—Collier's

NOTES FROM D.A.

HUGH McPHAIL

A supply of the following pamphlets and leaflets has come to my office recently: Dairy Barns; Shipping Fever; Water Resources; Helping the Farmer; Health of Our Animals.

Our department's Farm Notes have this to say of the dairy barns bulletin: "Those thinking of building dairy barns will welcome the guidance provided by the new bulletin."

A joint publication of the University of Alberta and the Alberta department of agriculture, this bulletin covers construction of both loose housing and conventional dairy barns with a view to their suitability for prairie conditions. Plans and sketches illustrate the various points under discussion and provide a ready reference for the farmer-builder.

This bulletin was prepared by F. V. McFarley, department of engineering, University of Alberta, and C. A. Cheshire and Ray Dixon, (tension engineer (agricultural), and supervisor of dairy herd improvements.

One recommendation that has been made to overcome some forms of Root Rot is to use heavy application of 11-18 fertilizer. Phosphorus does not stimulate root development and 11-18 contains 18 percent of that substance and should help roots withstand attacks. I am not suggesting this as a cure-all but it is worth trying. I believe weather conditions were particularly suitable for the development of the trouble this year.

RECOMMENDS DINOSAUR PARK NEAR DRUMHELLER

Establishment of a provincial park in the area of dinosaur beds and badlands southeast of Drumheller has been recommended to the Alberta government.

Hon. A. J. Hook, minister of economic affairs, said the report of C. M. Sternberg, former federal paleontologist, who investigated the matter, also recommends establishment of a museum at Drumheller to display the area's natural history.

STUDY SHOWS SHELTERBELTS REDUCE SOIL DRIFTING

Establishment of field shelterbelt projects in certain areas of Saskatchewan and Manitoba has permitted a study of the effect of tree rows on wind velocity and crop growth, says W. J. Staple, Soil Research Laboratory, Swift Current, Sask.

A series of dense, three-row shelterbelts, 18 feet high and spaced at 30-foot intervals, reduced the speed of a cross-wind at all points within intervening strips. A reduction of 10 to 20 percent was measured at the most exposed points. Hedges of single row caragana, 7 to 9 feet high, did not shelter at all points within a 30-foot strip, but the extent of sheltering was at least 20 times the height of the trees.

Other measurements showed that wind velocities were approximately the same at corresponding points in the strips between a series of single-row parallel hedges. There was no evidence of a cumulative effect—that the sheltering increased with the number of hedges to windward.

The extent and depth of snow drifts near field shelterbelts depends on a number of factors such as amount of snowfall, wind speed and direction and type of shelterbelt. In recent years 8-foot caragana hedges have held snow drifts 2 to 4 feet deep and 30 to 5 feet wide on each side of the hedge.

CHRISTIAN SCIENCE

The work required of his followers by the Master, Christ Jesus, will be emphasized Sunday in Christian Science churches under the topic, "Doctrine of Atonement." This passage from the King James version of the Bible will be used in presenting the subjects: "And when he had called unto him his twelve disciples, he came to them and said, 'I have chosen you, and have appointed you apostles to go and preach in all the world, and to heal all manner of sickness and all manner of disease.'" (Matthew 10:1). And this declaration from "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Christians are under as direct orders now, as they were then, to be Christ-like, to possess the Christ-spirit, to follow the Christ-example, and to heal the sick as well as the sinning." (p. 138)

"My son has chosen banking"

When a bank manager retired last year, he wrote his General Manager to tell why he was proud his son also had chosen a banking career:

"I shall always recall my banking days with pleasure and I cannot think of any other occupation that gives one a greater opportunity to meet people and form lasting friendships. I have been privileged to serve the bank in three provinces... That my son has chosen banking is also a great satisfaction to me. He is most anxious to make good on his own account."

Any young man on the lookout for an interesting and worthwhile career—for opportunities to grow and get ahead—should take a look at banking. Have a talk with the bank manager in your neighborhood branch. It may well prove an important turning point in your life.

WASTE OF LIFE AND PROPERTY
BY FIRE HAS INCREASED

Waste of life and property by fire
has increased so that the problem
extends far beyond the fire insur-
ance business, fire marshall and fire
prevention organizations. It is a
problem of national interest both
economically and socially.

The tremendous loss of life and
property every year commands the
special thought and attention of
every citizen interested in the wel-
fare of Canada.

Insurance can reimburse the in-
sured for lost property value, but
again, it has been shown from per-
centage that only a small percent-
age of policy holders are insured
up to full value, so that the policy
holder is unable to be recompensed
for his full loss. Insurance cannot
bring back national resources from
smoke and ashes, nor can it re-
store lives.

Carelessness and recklessness are
the principal enemies that we must
constantly fight against. Careless
use of matches and careless smok-
ing habits rank first in the list of
known causes of fire.

In 1950, the last year for which
statistics were published, out of
59,710 fires reported 21,995 were
caused by matches and smokers' carelessness. The match or tobacco
is the offender.

A government official stated the
problem very clearly and simply in
these words:
"Laws and ordinances, and the
earnest efforts of fire officials in
enforcing them, will not alone control
fire losses. Almost every fire is
the result of someone's carelessness.
We must strive to develop in in-
dividuals a deep sense of personal
responsibility to prevent fires — to
be careful at all times with things
that cause fire."

All citizens are in a position to
play a most significant part in this
vital conservation program — to
safeguard their own useful and ir-
replaceable properties and to take an
important part in the work of fire
prevention.

Co-operation and leadership in a
situation that concerns the welfare
of our national economy is the duty
of every Canadian.

T.B. Association To
Sponsor Essay Contest

Pupils in Alberta schools from
grade seven to twelve will com-
pete this autumn for prizes total-
ling \$1,500, in an essay contest
sponsored by the Alberta Tubercu-
losis Association. It was announced
last week by T. A. Shandro, pres-
ident. Information concerning the
contest will be sent out to schools
in all parts of the province and the
closing date for entries has been
set at December 23rd.

"This is the fourth consecutive
year that such a contest has been
held," said Mr. Shandro. "The pur-
pose is to spread more information
about tuberculosis among the
younger people and their parents.
Education and public information
are among our chief weapons in the
fight against TB."

Judges will be Dr. W. H. Swift,
Deputy Minister of Education, Dr.
G. R. Davison, director of the tuber-
culosis division, Department of Pub-
lic Health, and Eric C. Ansley, ex-
ecutive secretary of the Alberta
Teachers' Association.

Interest has been increasing year-
ly, and officials expect a record
number of entries in both the grad-
ed and rural school competitions.
Expenses of the contest will be de-
frayed from Christmas Seal funds,
as part of the health education pro-
gram of the association.

Watch Out For Rats

After enjoying life in the fields
during the summer the grown up
rat families are now looking for
winter quarters. They are moving
in upon elevators, farmsteads and
other buildings that will give them
food and protection. Five hundred
Alberta farmsteads have now been
poisoned-proof between town-
ships 23 and 37, in a strip 12 miles
wide in the eastern part of the
province. Rats entering this area
are not likely to live long, since
contact with the special powder
laid out for them means death.

It is reliably estimated that not
over 25 percent of the people in the
province know what a rat looks like.
BE ON THE ALERT. If you are sus-
picious of the presence of rats in
your vicinity, report it to your local
pest control officer, district agricul-
tural field supervisor. The last
mentioned is the pest control officer
for the municipality of Mountain
View. We will investigate and take
appropriate steps to deal with the
rat menace.

Last week we received a call from
Township 28, Range 27, from a
farmer who had killed an animal.
he thought was a rat. Upon inves-
tigation we discovered it was not a
rat but a mink. Action of this
nature upon the part of anyone who
is not sure is to be commended. We
are anxious for you to report to us
the presence of rodent-like animals
which you cannot positively iden-
tify yourselves. Eternal vigilance is
the price of freedom from an inva-
sion by this most undesirable
pest—the rat.

GOVERNMENT BUSINESS

PROVINCIAL DEBT

This is what your Alberta Government has done to the \$167,000,000 public debt accumulated between 1908 and 1935:

- \$25,000,000 was saved the taxpayers of Alberta outright through debt reduction negotiations.
- Average interest rate on Province of Alberta debentures in 1935 was 4.88 percent and now is 2.87 percent.
- A debt retirement plan has been arranged to wipe out the entire debt by 1973—in 21 years time—or at an earlier date if it is in the public interest to do so.
- This schedule of debt retirement will require 5 percent of the revenue on income account compared to 81 percent required to pay interest charges in 1935.

How much has the Provincial Debt been reduced?
 Total debt, March 31, 1935 \$167,027,144
 Total debt, March 31, 1952 97,742,487
 Debt reduction \$ 69,284,657

DISTRICT NEWS

M.V.B.C. NEWS

(From Our Own Correspondent)

Classes have begun again at the college. Everywhere students are rushing about orienting themselves as best they can with the help of those who have been here before. Daily schedules are now permanent and the registrar and Miss Rita Sawatzky have had a busy time meeting the requirements of all those who had conflicts. But that is past, and already assignments are the chief concern of the students, and the teachers are appreciating the enthusiasm of each one.

Monday evening was a time of fellowship and entertainment as all students in the college, as well as those living out, gathered around the dining room tables and enjoyed a Thanksgiving dinner. Mrs. Habermeil had prepared a tasty meal, and after the repeat Mr. Richardson led the group in singing. Mr. Taylor, president, brought a brief message, and Miss Irene Schlitt, vice-president of the Student Council, took charge of the entire evening.

The bountiful harvest has been appreciated by the college as at no other time. Even from fields at a distance, contributions of vegetables, fruit and canned goods have found their way to us. How grateful we are for the kindness and thought of our many friends here and farther away. We appreciate all that has been done for us.

The library is being catalogued according to the Dewey Decimal system this winter. Some valuable new books have been given to the college for the library. Others have sent some books that they no longer need in their homes. We wonder if others in this community do not have a number of books that would be of use to us. If so, bring them along and we will place them on our shelves with your name in them.

Several of the students took part in the radio program last Sunday morning. Remember, the broadcast of the United Missionary Church comes on the air each Sunday at 7:15 a.m. Next Sunday will be a special broadcast. You will want to hear it.

Mr. Waldin and several of the boys are busy almost every afternoon painting the roof of the boys' dormitory. They seem to enjoy this job, and the buildings will all look better when this has been accomplished. But it takes a lot of paint!

Mr. and Mrs. Lyle Richardson have taken up residence on the campus since we last reported. I am sure they will be at home to their many friends soon, and we trust that the winter will be filled with service in the field of music for them.

Mrs. Lemont was a visitor in the school on Monday. It was good to see her again.

On Monday night the students are in the dining room for the first time this year. Walls and floor looked fresh in new coats of paint, and soon the new drapes which the Women's Missionary Society has given will be on the windows. This is a real addition to the appearance of the dining room.

Most farmers are looking happy, as they completed harvesting operations last week, especially as the weather seems to be undergoing a change since Sunday. Even a few snow flakes fell along with the rain and hail. There are a few fields of stalks left to thresh but they are few and far between.
